ACCORD HOUSE

WATERPROOFING OF BALCONIES

PROJECT LOCATION

Mount Edgecombe, KZN

SIZE OF PROJECT

600 m²

NATURE OF PROJECT

For this project protection was applied through the use of dura.®flex.

dura.®flex is an excellent waterproofing barrier that has been widely used for the protection and repair of balconies, terraces, and haunching of concrete on roads and bridges.

ecofelt a saturation membrane for waterproofing was also used which is a polypropylene continuous filament membrane with a porous 3D fibre structure, produced by needle-punching the fibres to form a homogenous sheet and has excellent alkali resistance.

OTHER PRODUCTS USED

Unknown
